After Installing Debian using WSL:

sudo apt-get update
sudo apt-get upgrade
sudo apt-get build-essential

Check for g++ version: Should be 6.3 to be C11 and work with Visual Studio.
g++ -v
gcc -v

Make your code directory:

$ mkdir code
$ cd code
$ mkdir cdev
$ mkdir cppdev
$ cd cdev

Copy the hi.c to the cdev directory.

```
#include<stdio.h>
Int main()
{
   printf("Hi there\n");
}
```

Compile your C program by using this command:
$ cc hi.c

Run your program with this command:

$ ./a.out
